

PILE DRIVING

NOTICE

Update on the Washington Boulevard/
Paseo Padre Parkway Grade Separation Project

December 2007

PILE DRIVING ACTIVITIES TO BEGIN IN JANUARY 2008

With the new detour roads completed and open to traffic, the Grade Separation Project contractor will begin constructing the foundations for the various bridges at both Washington Boulevard and Paseo Padre Parkway and the retaining walls at Paseo Padre Parkway. The foundation work for these structures will require driving approximately 800 concrete piles. This notice provides more information about what to expect during this work which will begin in January 2008

WHAT ARE PILES AND WHY ARE THEY NEEDED?

Piles are concrete "posts" driven deep into the ground (30 to 60 feet on this project) to provide support for the bridges and retaining walls being constructed as part of the project

WHAT CAN I EXPECT DURING THIS WORK?

Pile driving utilizes a large diesel-powered "hammer" to drive the piles into the ground. This hammer will generate significant noise and vibrations, which may be perceptible by some local residents

WHEN WILL THE WORK OCCUR?

Since noise or vibration from pile driving activities is unavoidable, construction hours for this activity will be limited to between the hours of 8:00 a.m. and 5:00 p.m., Monday through Friday, to minimize inconvenience to residents.

On some occasions, work may also occur on Saturdays between the hours of 9:00 a.m. to 5:00 p.m.

Pile driving at Paseo Padre Parkway will occur between January 2008 and March 2008. At Washington Boulevard, pile driving will occur between February 2008 and April 2008. This schedule is pending weather or other unforeseen circumstances.
